Every American deserves to receive quality health care. But quality means different things to different people, especially when it pertains to the quality of care received from a hospital. Most people would probably agree that, at the very least, quality health care means receiving the correct diagnosis and the proper treatment in a timely fashion to achieve the best possible results. There are others who would also consider how they were treated by staff members as well as how comfortable they were during their stay.

Fortunately, there are scientific ways to measure health care quality, and Fulton County Health Center is committed to using those measures to improve patient care. “We’re very focused on the quality of care we provide,” says Jan Yoder, RN, BSN, MAOM, Compliance/Performance Improvement Director. “We continually measure how we are performing compared to other hospitals across the country. In order to improve we must be able to monitor, analyze, and make changes where needed in the care we give to our patients.”

Comparing “Apples to Apples”
One of the ways to measure health care quality is through the Hospital Consumer Assessment of Healthcare Providers Scores (HCAHPS), which is supported by the Centers for Medicare & Medicaid Services (CMS). HCAHPS provides a standardized way to measure patients’ perspectives on hospital care. “HCAHPS makes it possible to make ‘apples to apples’ comparisons of our patients’ responses to the survey questions with results from other hospitals around the country,” says Yoder.

The HCAHPS survey contains questions that ask a patient about his/her perspectives of the care they received. It also asks patients to rate eight key topics:

- Communication with doctors
- Communication with nurses
- Responsiveness of hospital staff
- Pain management
- Communication about medicines
- Discharge information
- Cleanliness of the hospital environment
- Quietness of the hospital environment

Fulton County Health Center has contracted with the independent National Research Corporation (NRC) since 2005 to conduct patient satisfaction surveys using the HCAHPS questions.

The questionnaires are randomly mailed to FCHC patients after they have been discharged and are sent back anonymously to NRC. From there, NRC rates FCHC’s quality measures in comparison to other hospitals nationwide, which can then be used to review and analyze the patient experience at FCHC.

Core Measures
FCHC is also participating in an initiative with the Centers for Medicare and Medicaid Services (CMS) focusing on meeting specific core measures when treating patients for five clinical areas:

- Acute myocardial infarction (heart attack)
- Congestive heart failure
- Coronary artery bypass graft
- Pneumonia
- Hip and knee replacement

Nancy Roynon, RN, BSN, Performance Improvement Manager explains that these core measures are guided by specific tests and treatments that have been shown to improve the patient’s outcome. “There are pre-defined treatment protocols for these five clinical areas that have been shown to make a difference with how the patient does,” says Roynon.
and found that 5-star rated hospitals had, outcomes in the nation’s 5,000 hospitals, quality data. HealthGrades analyzed patient ratings organization that examines patient HealthGrades is an independent health care nationwide of hospitals across the country. program is ranked in the top 15% in quality 5-star rating means FCHC’s Joint Replacement 2011 for its Joint Replacement program. This received a 5-star rating by Healthgrades in Centering, As reported in our Winter issue of Focus on Quality Pays Off Health "Performance Improvement Director, Yoder, RN, BSN, MAOM, Compliance/Improvement Manager (left), and Jan Nancy Roynon, RN, BSN, Performance Improvement Manager (right) review the results of patient satisfaction surveys.

Focus on Quality Pays Off
As reported in our Winter issue of Health Centering, Fulton County Health Center has received a 5-star rating by Healthgrades in 2011 for its Joint Replacement program. This 5-star rating means FCHC’s Joint Replacement program is ranked in the top 15% in quality nationwide of hospitals across the country. HealthGrades is an independent health care ratings organization that examines patient care using data from CMS along with other quality data. HealthGrades analyzed patient outcomes in the nation’s 5,000 hospitals, and found that 5-star rated hospitals had, on average, an 80% lower rate of complications than hospitals receiving a 1-star rating. “This is further evidence that shows our continued effort to monitor and improve the quality of our medical care is working,” says E. Dean Beck, FCHC Administrator. Improving Customer Service
In order to improve patient care, the Patient Experience Team is also working to emphasize customer service in all levels of care. “By improving customer service, we are also improving quality care for each patient,” states FCHC Administrator Beck. “We want each step of the health care process to be a positive patient experience.”

HUSH!
One area where patients’ surveys have indicated FCHC needs improvement is the level of quietness around their rooms. As a result, the Patient Experience Team is developing a hospital-wide “HUSH” campaign, an acronym for “Help Us Support Healing.” The HUSH campaign’s goal is to make the Health Center quieter, especially in the evening and overnight hours after visitors have left. “Studies show that people heal better in a quiet environment, so our focus is on making that happen,” says Roynon. “By working together, we can provide a healing environment for all of our patients.”

The HUSH campaign is multi-faceted and covers education, review of the facility and improving the delivery of care. The educational component involves reminding staff members, families, and visitors of the importance of reducing their own individual noise levels. The Patient Experience Team has also worked in conjunction with the night shift staff to coordinate the patient’s care, where possible, so they will have a longer length of time to sleep at night without having to be frequently awakened for vital sign checks, to administer medication or to have blood drawn. “Our goal is to exceed the patient’s expectations,” reflects Roynon.” The well-being of each patient is our prime mission.”

Quality Checks & Balances
The key to any health care organization’s level of quality is impacted by the decisions made and care provided by its staff. One of the methods of checking and balances for quality is provided through the FCHC Quality Assurance and Assessment Committee, which is comprised of physicians and other staff members. The committee is responsible for implementing peer reviews of physicians for cases that are considered unusual and out of the norm. The peer reviews are part of ongoing evaluations required by The Joint Commission that ensures the quality of care. Another method of monitoring quality of care is utilized by the FCHC Laboratory and Radiology Departments. Every morning technicians perform quality tests of the equipment to verify they are operating and reporting accurately. A patient’s diagnosis is often based on the results of these tests, so the equipment needs to be accurate and reliable.

Quality is Key
In the future a hospital’s reimbursement levels from Medicare and Medicaid could very well be tied to the hospital’s patient satisfaction surveys and quality of care indicator scores as an incentive for hospitals to improve their level of care.

“By improving customer service, we are also improving quality care for each patient.”
— E. Dean Beck, FCHC Administrator

Quality is Key
In the future a hospital’s reimbursement levels from Medicare and Medicaid could very well be tied to the hospital’s patient satisfaction surveys and quality of care indicator scores as an incentive for hospitals to improve their level of care.

“We understand the future financial implications of providing high quality care,” says FCHC Administrator Beck. “But ultimately our mission is to provide quality care that makes a difference, and that is what drives us to continually work at improving our level of services.”

By improving customer service, we are also improving quality care for each patient.”
— E. Dean Beck, FCHC Administrator
**The Unsung Heroes Part III: Pharmacy**

**Editor’s Note:** Unsung Heroes is a continuing series of Health Centering articles that profile the departments and staff members who work behind the scenes at Fulton County Health Center but are instrumental in helping to keep the Health Center functioning. In this issue we highlight Pharmacy Department.

have and make sure those conditions continue to be treated as well,” says Clausing. He says an example of the Pharmacist’s role is when a patient with diabetes is diagnosed with pneumonia and is prescribed medication for the pneumonia. “We have to make sure the patient can continue to take their insulin without having issues with the new medicine,” says Clausing. The Health Center is currently working on an order entry system for physicians to use instead of the handwritten method to prescribe medications. The goal is to speed the process and eliminate any potential errors. When the order entry system is complete, physicians will be able to order medications for their patients directly from their medical office. Since the Pharmacy Department is not open 24/7, there are special procedures in place for obtaining needed medications when closed. There is always a pharmacist on call who may be contacted or who is able to come back to the hospital if needed.

In addition to the main Pharmacy on the second floor of the Health Center, there are four Omniscell® drug dispensing units located in the Surgery Department, the Emergency Department, on the Health Center’s second floor, and also on the fourth floor. All orders placed by the staff nurse are under the direction of the attending physician, and the orders are verified by the FCHC Pharmacist before the drug can be dispensed from the Omniscell units, which are about the size of a refrigerator. The Omniscell dispensing units can only be accessed using a biometrics system that scans a staff member’s fingerprints before allowing access. Medical carts are used on other floors and are locked in a special room when not in use. “We keep very tight control on the location and dispensing of our pharmaceutical drugs,” says Clausing.

(Continued on page 5)
Voice Recognition Technology Benefits All

FCHC’s Radiology Department continues to tap into state-of-the-art technology to improve its services. The latest addition is Voice Recognition software that allows a Radiologist to dictate a patient’s medical report into a microphone and have it routed through a speech recognition system that has been programmed to remember the Radiologist’s voice. As the physician dictates the medical report, his words are automatically typed on a computer monitor. The Radiologist reads what is typed on the screen and makes any needed corrections, or he can send it electronically to the transcriptionist for quick editing. The Radiologist can immediately sign it and send it off to the patient’s physician within minutes. “The great thing about the technology is the speed of the system,” says Barb Gibson, Radiology Unit Manager. “It’s much faster than the traditional method of dictating a patient report. The fast turnaround time quickly gets the patient’s report into the hands of the primary care physician so he/she can act on it and begin providing the necessary care much sooner.”

The Unsung Heroes Part III: Pharmacy (Continued from page 4)

A Busy Department
In 2010, the FCHC Pharmacy Department placed 169,329 pharmaceutical orders and dispensed 143,582 medications to inpatients and outpatients. Included in those numbers were 17,284 intravenous medications that were prepared, many of which were used to treat cancer patients in the Rainbow Hematology/Oncology Treatment Center at the Health Center. The mixing of cancer treatment drugs is done in a special IV room whose temperature and pressure are carefully regulated. The Pharmacy Technician mixes the drugs under the watchful eye of an FCHC Pharmacist, working under a hooded area in the lab that uses HEPA filters to trap any vapors. Pharmacy staff members are required to wear protective gowns and eye wear. “We need to protect the staff members from exposure to these powerful drugs, but we also want to prevent the contamination of the medications themselves,” says Clausing. A second temperature and pressure regulated room with protective hoods is used by the department to prepare non-hazardous IV’s.

The Future of Pharmaceutical Drugs
Pharmacy Director Clausing has seen a lot of new pharmaceutical drugs introduced in the 47 years he has been in health care. He says there are no “magic bullets” on the horizon, but research continues to search for promising new drugs. “The bio-med companies today are looking at genetically-engineered drugs that are designed to consider the genetics of each individual patient so as to create a drug that offers the best outcome with the least amount of side effects,” says Clausing. “It’s an ongoing war being fought by the pharmaceutical researchers in order to combat new and existing diseases and infections.”

For more information about the FCHC Pharmacy Department, contact Director Ed Clausing, RPh., at 419-330-2690.

Health Tips is designed to offer you simple suggestions for a healthier lifestyle. In this issue we offer:

Exercise Tips To Get Moving!

Now that the cold winter months are just about behind us, here are tips to get up, get out, and get moving!

1. Set Realistic Goals – Focus on increasing healthy behaviors. Begin with planning to exercise 10-15 minutes a day, then work up to 30-45 minutes per day.

2. Be Consistent – No exercise program works if you don’t do it regularly.

3. Use the Buddy System – Encourage one another. Be accountable to someone else.

4. Be Patient – Setbacks happen. Focus on the successes and hang in there and you will see results.

5. Make it Fit Your Life – Are you a morning person or does afternoon or evening suit you best? Schedule your workout when you have the most energy.

6. Call in the Pros – Join an FCHC Fitness Class or the FCHC Rehab Center and get the most out of your workout! See this newsletter for classes, locations and times.

Omnicell® is a registered trademark of Omnicell, Inc.
In our last issue of Health Centering I wrote about the 5-star rating in 2011 for our Joint Replacement program that places Fulton County Health Center in the top 15% of hospitals across the country. That high ranking is the result of a concerted effort on the part of doctors, nurses and other staff members to raise the bar and push for positive surgical outcomes. The effort put forth in our Joint Replacement program is hospital-wide, and our lead story in this issue discusses our focus on quality. About a year ago we established a Patient Experience Team with members from all disciplines within our Health Center. The purpose of the team is to focus on improving the quality of medical care and the patient's experience at Fulton County Health Center. I am pleased to say that independent research shows we rank very high in certain areas, and in those areas where we need to improve we are taking concrete steps to do so. Please take time to learn more about our focus on quality.

This issue also continues the series on The Unsung Heroes of the Health Center, this time with a look at our important Pharmacy Department. The medications that are used today are powerfully effective. It is the responsibility of Pharmacy to make sure patients are given the right medication at the right dosage and that there are no potential issues with new medications interacting negatively with other medications they are taking.

Finally, we have included our annual Report to the Community in this issue. The report provides a snapshot of the medical care we provide to both inpatients and outpatients. Take time to learn more about your local hospital.

I am looking forward to the warm spring weather that is just around the corner. Take time to enjoy the fresh air and get some exercise.

Sincerely,

E. Dean Beck,
FCHC Administrator

---

**Message from the Administrator**

In our last issue of *Health Centering* I wrote about the 5-star rating in 2011 for our Joint Replacement program that places Fulton County Health Center in the top 15% of hospitals across the country. That high ranking is the result of a concerted effort on the part of doctors, nurses and other staff members to raise the bar and push for positive surgical outcomes. The effort put forth in our Joint Replacement program is hospital-wide, and our lead story in this issue discusses our focus on quality. About a year ago we established a Patient Experience Team with members from all disciplines within our Health Center. The purpose of the team is to focus on improving the quality of medical care and the patient’s experience at Fulton County Health Center. I am pleased to say that independent research shows we rank very high in certain areas, and in those areas where we need to improve we are taking concrete steps to do so. Please take time to learn more about our focus on quality.

This issue also continues the series on The Unsung Heroes of the Health Center, this time with a look at our important Pharmacy Department. The medications that are used today are powerfully effective. It is the responsibility of Pharmacy to make sure patients are given the right medication at the right dosage and that there are no potential issues with new medications interacting negatively with other medications they are taking.

Finally, we have included our annual Report to the Community in this issue. The report provides a snapshot of the medical care we provide to both inpatients and outpatients. Take time to learn more about your local hospital.

I am looking forward to the warm spring weather that is just around the corner. Take time to enjoy the fresh air and get some exercise.

Ladies, are you taking care of your mental and physical health?

Maybe we can help. The FCHC Corporate and Community Health Promotion Department will hold “A Morning for Me” Women’s Wellness Forum on Saturday, April 2, 2011 from 7:30 a.m. – 1:30 p.m. in the FCHC Beck Meeting Room. The cost of the event is $10/person, which includes a continental breakfast, lunch, giveaways, and a chance to win door prizes. Seating is limited, so pre-registration and payment are required to secure a seat. Credit card pre-payments will be accepted over the phone; checks must arrive prior to the event (mail to Sharon Morr, FCHC Corporate & Community Health Promotion Department, 725 South Shoop Avenue, Wauseon, OH 43567). Pre-registration begins March 21st by calling 419-330-2735.

The event, which is sponsored by Fulton County Health Center and the “Healthy Choices, Caring Communities Coalition,” will focus on several informational talks. The keynote speaker will be DeLores Pressley, a nationally known motivational speaker who has appeared on The Oprah Winfrey Show and has spoken to many corporations, organizations and businesses across the country. Pressley has inspired audiences for the past 20 years and shown them how to channel their personal power to achieve success in their lives and careers.

“We want to help any woman out there who is interested in their health,” says Sharon Morr, FCHC Director of Corporate and Community Health Promotion. “But this conference will be especially useful for mothers, sisters, aunts, and grandmothers who are involved with raising teenagers and encounter family conflict in the process.”

Here is a breakdown of the half-day event:

7:30 a.m. – 8:15 a.m. ................................................................. Registration, continental breakfast, limited number of free blood pressure and blood sugar screenings

8:15 a.m. – 8:30 a.m. ................................................................. Welcome. Sharon Morr, FCHC Director of Corporate & Community Health Promotion

8:30 a.m. – 9:15 a.m. ................................................................. Recognizing and Understanding the Signs of Drug Abuse. Officers Kevin Chittenden and Brian Courtney, Wauseon Police Department

9:15 a.m. – 10:00 a.m. ................................................................. Conflict Resolution, A Win, Win Outcome. Antonia Jensen, LISW-S

10:00 a.m. – 10:15 a.m. ........................................................................................................... Break

10:15 a.m. – 11:00 a.m. ................................................................. Minimally Invasive Plastic Surgery. Marlene C. Welch, M.D., Ph.D., Assistant Professor of Surgery, Division of Plastic & Reconstructive Surgery, University of Toledo Medical Center

11:00 a.m. – 11:45 a.m. ................................................................. Success with Stress. Andrew Lesniewicz, PCC CHt, Professional Clinical Counselor and Clinical Hypnotherapist, FCHC Stress Unit

12:00 p.m. – 1:00 p.m. ................................................................. Lunch

1:00 p.m. – 1:30 p.m. ................................................................. Door Prizes

“A Morning for Me” Women’s Health forum will feature nationally known motivational speaker DeLores Pressley. Pressley’s Believe in the Power of You: Leveraging Your Personal Strengths will inspire you to feel confident in knowing what you bring to the table and help you understand how to make yourself stand out from the others. By learning how to stretch your comfort zone and tap into what you love to do, you’ll create opportunities you never thought possible. Discover how to empower yourself and others for career and personal fulfillment by spending a fun-filled, inspirational and thought provoking time with yourself while learning to:

✓ Clarify your personal strengths and opportunities
✓ Set realistic and achievable career and life goals
✓ Achieve work-life balance
✓ Take responsibility for your own development

Funding for this conference was made possible (in part) by Grant 5H79SP015851-02 from ONDCP and SAMHSA. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Office of National Drug Control Policy or the Department of Health and Human Services, nor does mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.
Health & Fitness Classes

Register on-line at www.fultoncountyhealthcenter.org (click on Health Classes/Special Events), or call 419-330-2735. Most classes except a few special classes such as Aquatics, Belly Dancing, & Yoga can be mixed and matched for dates/times/locations. 7 Week Session — March 28 – May 14; 7 classes - $28, 14 classes - $40, 15 or more classes - $50.

### Health & Fitness Class Descriptions

**Aikido - Beginner**
Is a non-competitive martial art that can be practiced by almost anyone. Aikido techniques do not rely on physical strength, but rather it develops relaxed power through the focus of intention and Ki. The result is a creative method of non-destructive conflict resolution.

**Aquatic Aerobics**
A high-energy, vigorous workout performed in shallow water to avoid injury. Great for toning and strengthening.

**Arthritis Aquatics**
Consists of range of motion, muscle strengthening, stretching and endurance building activities. All classes are structured so participants can work at their own ability level.

**Aquatic Noodle Workout**
Using the noodle for upper and lower body toning, abdominal toning and aerobic workout, you’ll push it, pull it, float on it, balance on it, and get an awesome workout!

**AbleKinetics™**
Utilizes any fitness training product available to create a dynamic workout that will consistently challenge the body with creative, innovative exercises. There are NO repetitions, NO rest, NO choreography, and NO two classes are the same.

**Ball**
Incorporated into your workout to perform a variety of balance, core training, strength training, and flexibility exercises.

**Ballroom Dance**
Dancing is easy, fun, beautiful, elegant, modern, and stylish! The session will include fun country dances and latino dances which will include: popular salsa and fiery cha cha cha. All of the dances can easily be used at home or at a number of social events. This class will elevate the heart rate and challenge the body!

**Belly Dance**
Fitness for women of any age and body shape. It’s a great and fun workout. Belly dancing utilizes muscles not often used otherwise. It’s something that everyone can learn and enjoy.

**Cardio Core**
A class geared toward variety! You’ll be stepping on a bench, performing aerobic moves on the floor, using the Ball and Body Bars. A great all-in-one workout incorporating both cardiovascular, flexibility and strength training!
Health & Fitness Class Descriptions

Cardio Dance (formerly Smooth Moves)
Choreographed with upbeat dance and aerobic moves to gain strength and improve cardiovascular health. A fun, high energy workout suitable for all fitness levels.

Golden Retrievers
Gain strength and flexibility in this no-sweat exercise class. Many of the exercises are performed sitting on a chair.

Kids Tumbling For Fun – Beginner
Designed for the gymnast who is just starting his or her career. This class will introduce the beginning basics of the sport, such as: forward and backward rolls, cartwheels, headstands, etc. If you have no previous gymnastics experience, and you are excited to learn, this class is for you!

Kids Tumbling For Fun – Intermediate
Requires previous gymnastic experience, must be able to do a handstand and cartwheel.

Parent & Child Water Wonders
Parent/guardian must be in the water. The child will be exposed to games that use basic swimming movements in the water, such as straight leg kicks, arm strokes and breath control.

Health & Fitness Class Descriptions

Parent & Child Water Wonders - Advanced
Parent/guardian must be in the water. Class works on performing various strokes and skills while experiencing an enjoyable time in the water.

SilverSneakers® Muscular Strength & Range of Motion
Have fun and move to the music through a variety of exercises designed to increase muscular strength, range of movement and activities for daily living. Hand-held weights, elastic tubing with handles and a SilverSneakers® ball are offered for resistance. A chair is used for seated and/or standing support.

Total Body Tone
This class utilizes and requires a light pair of dumbbells and an exercise mat. Individuals will go through a 60 minute workout that will include a warm-up, resistance training session that will target the entire body, and a cool down.

Turbo Kick®
It’s a combination of kickboxing and dance moves all perfectly choreographed to energetic and motivating music. It’s the ultimate cardiovascular challenge that’s a unique blend of strength and endurance interval training, and a relaxing cool-down.

Yoga
This class consists of basic Yoga postures, breathing and relaxation techniques. Yoga poses and passive stretches are the focus of this artful format. It’s a total body workout as you use the weight of your body to hold the various poses!

Yoga - Gentle
A class for people new to yoga or for those who are experiencing joint sensitivity, overall stiffness due to lack of activity, or other physical limitations.

Yoga - Intermediate
This class covers yoga poses and their variations in more detail than the other classes and includes some challenging poses. Poses are held longer than in the beginner classes in order to increase strength, balance and flexibility.

Zumba®
Zumba is a fusion of Latin and International music - dance themes that create a dynamic, exciting, effective fitness system! The routines feature aerobic/fitness interval training with a combination of fast and slow rhythms that tone and sculpt the body.

Cost: $50 per person for either a Stop Smoking or Weight Loss Seminar, which includes a reinforcement CD and the option of attending a future seminar. Bring a friend at a discounted price of $40 per person.

### Stress Management
We do not like to think about or plan for “old age,” unless it is to put funds into our retirement account. While financial stability is important, it is not the only thing to consider. We will talk about our changing roles as children, adults, parents, grandparents, to being caretakers of our own parents. How we process and deal with these changing roles and responsibilities has a huge impact on our relationships. We will also have a general discussion on recognizing and addressing the early signs and symptoms of dementia. This discussion will last about an hour and will cover aspects of Mary Pipher’s book, *Another Country*. Presented by Christina Hancock, LISW-S, Fulton Stress Unit. Tuesday, April 12, 7:00 pm, Free, FCHC 2nd Floor Surgery Conference Room.
Diabetes Education & Support

Dining with Diabetes. An OSU Extension Cooking School for people with diabetes and their support persons in partnership with FCHC and the Fulton County Health Department. Start Swinging Those Clubs
The FCHC Auxiliary will hold its 12th Annual Auxiliary Golf Tournament on Thursday, June 2, 2011. The 4-person scramble will begin with registration at 11:00 a.m. followed by a noon shotgun start. The outing will again be held at Ironwood Golf Course, 1015 West Leggett St., Wauseon. The popular event features prizes for the longest drive, closest to the pin and longest putt. A silent auction and dinner at FCHC will be held after the 18-holes of golf. The cost to participate is $70 per person or $280 for a team of four players. The fee covers 18 holes of golf with a cart, sack lunch, gift pack, beverage tickets, and BBQ chicken dinner. Sponsorship opportunities are available: $550 – Gold Sponsor; $450 – Silver Sponsor; $350 – Bronze Sponsor. Proceeds from the auction are used by the FCHC Auxiliary to fund projects at the Health Center. Entry deadline is May 20 and is limited to the first 36 paid foursomes. For more information, contact Janice Fitzner in the FCHC administrative office at 419-330-2603.

Need a Lift?
The FCHC’s free courtesy shuttle transports patients and visitors from our parking lots to various entrances to our facility. The shuttle is particularly convenient when the weather turns bad. The shuttle operates Monday – Friday, 7:30 a.m. – 5:00 p.m. It does not operate on weekends.

Auxiliary News

June 2 - FCHC Auxiliary Golf Outing, Noon shotgun start, see related article in News & Notes

Volunteers Needed
Want to give back to your community? Consider becoming an FCHC Auxiliary volunteer. The Health Center relies on volunteers to provide escort services; assistance in the cafeteria or kitchen; working in the Gift Shop and at the Information Desk during the evenings and on weekends; and serving as receptionists in various departments. Please call Julie Engler, Volunteer Coordinator, at 419-330-2695 to schedule an interview.
